WORK PLAN APPROVAL – BUILDING 1/36 PRE-INJECTION TEST PLAN, FORMER C-6 FACILITY, 19503 NORMANDIE AVENUE, TORRANCE (GENERAL WASTE DISCHARGE REQUIREMENTS ORDER NUMBER R4-2002-0030 (SERIES 007), COMPLIANCE FILE NO. CI-95-036, SLIC 0410, FILE NO. 95-036)

Dear Mr. Mossman:

We have received the "Building 1/36 Pre-Injection Test Plan" (Plan) dated October 21, 2004 prepared by Arcadis G&M Inc. Boeing Realty Corporation (BRC) applied for and received General Waste Discharger Requirements for the injection of molasses as part of the groundwater remediation program. A site-specific monitoring and reporting program was prepared for monitoring of the approved groundwater remedial program.

BRC proposed to conduct a pre-injection test at a limited number of injection wells to verify design parameters prior to full-scale operation of the system and will consist of injecting about 1,200 gallons of solution in to four wells.

BRC will be required to conduct groundwater monitoring for the pre-injection test, but due to the limited amount of solution being injected BRC is not required to implement the full monitoring and reporting program. Instead, BRC is required to monitor groundwater for the parameters and locations specified in the Plan, and provide a report presenting the results of the pre-injection test by **January 31, 2005**.

Please call Mr. John Geroch at (213) 576-6737 or Dr. Rebecca Chou at (213) 576-6733 if you have any questions.

Sincerely,

Jonathan Bishop
Executive Officer
